## ROMOTICS

AMR for engineers & technicians

### The Project

ROMOTICS – AUTONOMOUS MOBILE ROBOTS IN INDUSTRY 5.0 will offer innovative teaching and learning practices in order to achieve the upskilling and reskilling of Automation and robotics students. ROMOTICS also wants to achieve the improvement of the educational offer. It will offer Training for teachers in Challenge-Based Collaborative Learning approach emphasizing in the importance of the development of transversal skills of students so that they are able to adapt to the continuous changing working environments.

### Goals

ROMOTICS project will prepare students (future workers) to work with the emerging technological realities in the automated systems and robotics fields for the Industry 5.0 scenario, where there is even more collaboration between humans and robots.

### Consortium

#### COORDINATOR

- POLITEKNIKA IKASTEGIA TXORIERRI (SPAIN)

#### PARTNERS

- European Digital Learning Network ETS (Italy)
- IDEC S.A. (Greece)
- Apro Formazione S.c.a.r.l. (Italy)
- AFPI EURE SEINE ESTUAIRE (France)

Co-funded by  
the European Union
