PROFF PROJECT - PROTECTION AGAINST FLASH FLOODS

PROFF is a STEM educational project, funded by the Erasmus+ programme of the EU, that develops a series of workshops for Vocational Education and Training (VET), on the topic of natural disasters, focusing on protection from flash floods, as a result of climate change.

The free educational tools of PROFF are addressed to VET teachers and VET schools, with the aim to increase the capacity of European VET teachers on applying STEAM methodology and using digital tools (like the Augmented Reality App) in their classrooms.

PROFF TEAM

6 partners from 4 different countries (Slovakia, Greece, Spain and Lithuania) are involved in this project, contributing with their educational, scientific and digital expertise in the development of PROFF educational tools.

AR APP

The development has started! PROFF team is currently working on the Augmented Reality application, a mobile based and free app for STEM teaching with flash floods scenarios.

Interested to test it? Register online and we will inform you as soon as it is available!
