

REGIO.DIGI.HUB - Regional Development Digital Education HUB

Learning, Teaching and Training Activities

The **3-days training course** will be organized in **Greece by Atlantis, in Thessaloniki** and will take place in September 2023 and will be dedicated to the **final version of E-learning platform**. It is an integral part of the general objectives of the project. Training is needed to ensure that participants in partner organizations (GUIDELINES) are well informed and trained to carry out pilot testing to be conducted, to ensure that all electronic materials and tools are tested and reviewed while the at the same time, they are prepared to act as local target group guidance. In this way, **all partners will be more confident** in using the developed E-learning platform. The above professionals will play the role of GUIDELINES for the workers in the regional development sector who will be responsible for the pilot training or, if the situation so requires, for their online guidance. Budakov Films, as the developer of the E-learning platform, will assure the attendance of two trainers who will present how to use the E-learning platform and its facilities. **The training is particularly important** for all professionals involved in the project, but the added value is the opportunity offered to them for: *further professional development; involvement intransnational learning mobility*, which will broaden their horizons and extend their capabilities, motivating them for further work. . A great opportunity is given with the possibility of organizing **study visits in Thessaloniki** to see how is working the local ecosystem in the regional development sector.

The third transnational project meeting

The **third meeting was held in Derio (Spain) on 29/30 March 2023**. The meeting was hosted by our partner **Txorieri**. All partners participated in the meeting. The partners discussed about the **Multiplier Events – 1st round, Training manual, the development of the E-learning platform, Learning, Teaching and Training Activities**, as well as the dissemination process. The partner in charge of producing the E-platform, Budakov Films, showed us the platform prototype and we we're pleased to see how functional and friendly-use it is. The team and collaborative atmosphere that prevailed helped to make the meeting fruitful and successful. Partners discussed about the outputs that will be developed in line with the objectives of the project, as well as the coordination in general and issues related with the management and financial reports. All partners, responsible for specific activities presented the tasks and obligations of the involved parties. The partners agreed and scheduled the **fourth transnational meeting which will be held in autumn in Novi Sad, Republic of Serbia** and will be hosted by RDA Bačka. We are all looking forward to the next meeting and our visit to scenic and full of beauty Republic of Serbia! Our serious work continues and we will soon present the first products of the project at the multiplayer events that are about to happen.

What lies ahead

Multiplier Events – 1st round

We look forward to organizing the first round of events that will present the results of IO1 and IO2 for evaluation and feedback. This first round will be **Pilot Trainings** and will take place in the six partner countries: **Romania, Bulgaria, Republic of Serbia, Slovenia, Spain and Greece**. We are planning for this to happen **in June 2023** and we are expecting **at least 130 people**. This pilot events will be suitable for participants as workers in the regional development sector; regional development agencies, innovation agencies, civil servants from local public administration, European Structural Funds consultancy companies, SMEs, trainers, researchers, policymakers, senior technicians, key socio-economic actors in the regional development sector and other stakeholders in the project.

Follow us on social media on the project's **Facebook page** and stay updated about all new and interesting activities.

Partners:

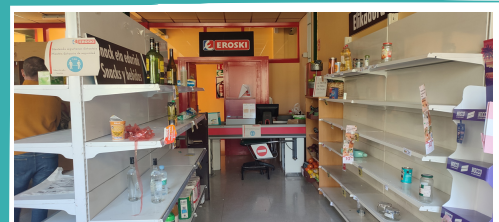

The Training materials and Training course

15 skills have already been decided through prior research of the consortium. The course will train workers on the regional development sector in the already mentioned themes, based on a Moodle-based learning Management system (LMS) with high quality online training. The objective will be to educate and create regional talent by means of 15 specified skills on the themes of:

- **Smart Specialization Strategies**
- **Green and Digital Transformation**
- **Innovation Entrepreneurship**

Our visit to POLITEKNIKA IKASTEGIA TXORIERRI

During the partner meeting, our hosts did us the honor of showing us around the campus. We saw the conditions under which the young people are trained there and how well equipped the facilities are. Well-equipped halls and laboratories allow the material to be learnt through practical activities in an environment close to the real one.
