

REGIO.DIGI.HUB - Regional Development Digital Education HUB

The 1st Multiplier Event in Spain

The Multiplier Event took place on **June 28th, 2023**, at Politeknika Txorierri's facilities in Derio, Spain. **40 participants** were involved among them trainers / teachers from diverse VET center located in the Basque Country. Positively evaluated by most of the participants, the event and the project outcomes were stated to be interesting for the aim of the project and for their implementation in their respective organizations. A group dynamic was conducted during the event to exchange ideas and opinions, that was also used to fill in the online questionnaire and to discuss about the diverse training materials.

Project number: 2021-1-R001-KA220-VET-000028118

TRANSNATIONAL PROJECT MEETING in Novi Sad

During the first week of November REGIONALNA RAZVOJNA AGENCIJA BACKADOO NOVI SAD hosted *the last Transnational Project Meeting!*

In a great atmosphere, during this time we had the opportunity to organize the last steps of the project and to say our goodbyes to the amazing partners that have made possible the smooth development of the **Regio.Digi.Hub Project**.

Key Discussions & Highlights:

All partners actively participated and contributed valuable insights. We reviewed the Project Management; Implementation of Three Project Results; Dissemination of Project Activities; Quality Management and Sustainability Management for Long-Term Impact

A special thank you to our Serbian partners for hosting us and making the experience in their country to be so great!

**External events and project dissemination
Romania**

On 6th of October, NERDA presented the Regio.Digi.Hub project results to the antreprenors from Romania and Republic of Moldova. The interest in the project's activities was incredible!

Multiplier Events – 2nd round

in **October 24th in Athens, Greece, IDEC S.A.** delivered an informative presentation about the project and about the launching of the e-learning platform, showcasing the current challenges in professional training of Regional Managers in the emerging topics of Green and Digital transition, Smart Specialisation and Innovative Entrepreneurship. During the presentation it was highlighted how the training materials produced by the project, available in the e learning platform can support regional development initiatives in the new era of digital technologies.

Partners:

Why the training in regional development is important?

Regional development training helps people to understand the factors that contribute to economic growth and development, and how to develop **strategies** to improve the economic performance of their regions. This can lead to increased **employment**, higher incomes, and improved quality of life. Those trainings can help to address the **social and economic disparities** that can exist between different regions of a country. By understanding the causes of these disparities and developing strategies to address them, **regional development training** can help to create more equitable and inclusive societies. We support this process with our E-learning platform which could be accessed via project website

Multiplier Events – 1st round

Multiplier Event in Bulgaria

On 20.07.2023, the Rouse Chamber of Commerce and Industry organized an information event and a discussion meeting on the topic **"What is Upskilling" and why it is important for employees today**. What skills are needed to increase the qualifications of those working in the regional development sector". It was attended by representatives of the Municipality of Ruse, University of Ruse, Bureau of Labor, Bulgarian-Romanian Chamber of Commerce and Industry, training centers and Ruse non-governmental organizations actively working in the field of regional development. The event ended with a **discussion** in which the representatives of the stakeholders shared about the challenges, problems and needs they face on a daily basis in their work. The need to constantly upgrade their skills and competences in the field of digital technologies, the new realities facing the regions related to climate changes and the need to adapt jobs were also discussed. Various good practices in the field of regional development in other European countries were also presented.
